Index to Volume 20 (1987)

No 1 (February)	pp 1–90	No 4 (August)	pp 207–266
No 2 (April)	pp 91–142	No 5 (October)	pp 267–330
No 3 (June)	pp 143–206	No 6 (December)	pp 331–386

Articles

A method for calculating the perimeter of objects for automatic recognition of circular defects
K. Inoue and K. Kimura 223

A new X-ray method for measuring residual stress and diffraction line broadness and its automation
M. Kurita 277

Backscatter/transmission X-ray thickness gauge
J.J. Allport, N.L. Brouwer and R.A. Kramer 217

Changes in ultrasonic defect location and sizing
M.G. Silk 9

Coupled electron/photon Monte Carlo calculations of X-ray scattering with application to industrial radiography
G. Barnea and C.E. Dick 111

Design of Hall-effect sensors for magnetic testing of steel ropes
E. Kalwa and K. Piekarski 295

Design of inductive sensors for magnetic testing of steel ropes
E. Kalwa and K. Piekarski 347

Digital enhancement of video images for NDT
S.F. Burch 51

Eddy-current surface-crack sizing in steel with high lift-off
J. Blitz, V.J. Willstätter, S.R. Oaten and N.T. Hajian 105

Experiments in Compton-scatter imaging of materials with wide ranging densities using a low intensity gamma source
B. Bridge, F. Harirchian, D.C. Imrie and Y. Mehrabi 339

Feasibility study of cosmic-ray nondestructive testing through structural analysis of subway stations
S. Minato 231

Finite element calculation of magnetic flux leakage detector signals
D.L. Atherton and M.G. Daly 235

Finite element calculation on the effects of permeability variation on magnetic flux leakage signals
D.L. Atherton and W. Czura 239

Flaw plane identification: a new imaging technique in NDT
J.P. Zhang and Y. Wei 355

Gamma-ray scattering NDE
R.S. Holt and M.J. Cooper 161

Instrumentation for NDT within the National NDT Centre
B.J. Smith 23

Locating flaws in three dimensional space using a transmitter-receiver system
D.K. Mak 117

Magnetic leakage flux testing with probes: physical principles and restrictions for application
G. Dobmann, G. Wallee and P. Hollen 101

NDT 20 years on – a personal opinion
F.A. Wedgwood 63

Nondestructive evaluation of protective and thermal barrier coatings: a current survey
W.N. Reynolds 153

Nondestructive measurement of stress in ferromagnetic steels using harmonic analysis of induced voltage
H. Kwun and G.L. Burkhardt 167

Nondestructive testing of offshore structures
M.R. Anderson 17

Nuclear NDT developments at Harwell
J.C. Collingwood 33

Residual stresses and X-rays
J.C. Middleton 291

Simultaneous dynamic neutron and gamma radiography
M. Balaskó, E. Sváb and L. Cser 157

Some comparisons between the measurement of stress in mild steel by means of Barkhausen noise and rotation of magnetization
R. Langman 93

The acoustic evaluation of wire ropes immersed in water
N.F. Casey, K.M. Holford and J.L. Taylor 173

The effect of crack closure on the reliability of NDT predictions of crack size
R. Clark, W.D. Dover and L.J. Bond 269

The National Nondestructive Testing Centre: An historical look at the first 20 years
R.S. Sharpe 4

The sensitivity of the mechanical impedance method of nondestructive testing
P. Cawley 209

The use of ultrasonics for residual stress analysis
S.E. Pritchard 57

Ultrasonic detection of cracks in wheel set axles
J. Szelazek 177

Ultrasonic materials characterization
R.L. Smith 43

Ultrasonic NDE of cast stainless steel
D.S. Kupperman, K.J. Reimann and J. Abrego-Lopez 145

Ultrasonic phased arrays for NDT
A. McNab and M.J. Campbell 333

Use of ultrasonic velocity for nondestructive testing evaluation of ferrite content in duplex stainless steels
T.R.G. Kutty, K.N. Chandrasekharan, J.P. Panakkal, S.K. Ghosal and P.K. De 359
